Subject: Banning of medically useful antibiotics
Auto forwarded by a Rule

Dear Ms. Henney:

I am writing to express my concern about the addition of medically useful antibiotics to animal feed. As one who has responded dramatically to antibiotics in the past, I find it frightening that we may become immune to them in the future because of the careless use of them with animals.

I believe it is mandatory that they be banned from animal feed for the good of humanity.

Sincerely,

Anne Campbell Dilley
